EXTRUSIONS

COMBINE
WITH A SYSTEM

- This brochure is a collection of aluminium extrusions, sorted by function and form for your convenience
- All drawings are true to size, unless stated otherwise
- Standard length are 5000 mm and 6000 mm depending on product line. Special lengths are available to a maximum of 6930 mm. All custom lengths are special order only
- All extrusions can be supplied fully assembled
- All extrusions are available either raw, matt anodized (E6/EV1), polished anodized (E4/EV1), or with RAL powder coating
- Most articles displayed are readily available, depending on demand and finish
- Articles marked with * are only available on request in minimum order quantities with a certain lead time
- Non-standard extrusions, made for your requirements, can be realized on demand

ALU MIN IUM

ALUMINIUM EXTRUSIONS

The OCTANORM® systems consist of an extremely wide range of aluminium extrusions. The high specific strength of our premium quality aluminum alloy makes it an ideal material for our OCTANORM® components and guarantees decades of reusability. The light weight makes for short assembly times and also reduces transport costs and CO₂ emissions.

PLASTIC

PLASTIC EXTRUSIONS

In addition to our aluminium extrusions, our product portfolio includes a wide range of supplementary plastic extrusions – from connecting extrusions to cable ducts and cover extrusions. As a material, plastic offers decisive advantages for on-site adjustments. It is flexible, lightweight and easy to modify. Matching the colours of our various aluminium surfaces, the extrusions blend in perfectly with the overall appearance.
